

How to ...

... register for your Pension Account for the first time

You can register for a Pension Account by going to your scheme website and click on 'Log in'.

You'll need to confirm some personal details.

All the data we provide on your Pension Account, and the data you give us when you're using it, is kept securely on our administration system. We'll only ever email you with relevant information about your pension, and we'll only share data with third parties where necessary or reasonable to do so for the purposes of administering your pension.

Keep in touch.

memberenquiries@seimastertrust.co.uk

To view your savings, visit
www.seimastertrust.co.uk and click on the 'Log in' button.

Step 1

Visit your pension website and click on 'log in'.

Enter your temporary username and password - this will have been sent to you via email or letter when you join the scheme.

Step 2

Confirm your personal details. They need to match the ones held by our scheme administrators, XPS, in order to proceed.

Step 3

Enter your personal email address and confirm it.

Then, when you receive an email from us, click on the verification link.

Step 4

Now you can set your username and password, taking note of the password requirements.

For added security, we have Multi-Factor Authentication (MFA), which can be done using an authenticator app or SMS (text message).

When you have completed these steps, click submit. You can then log in with the username and password you have chosen.
